

Diverter Valve and Recirculation Nozzle Assembly

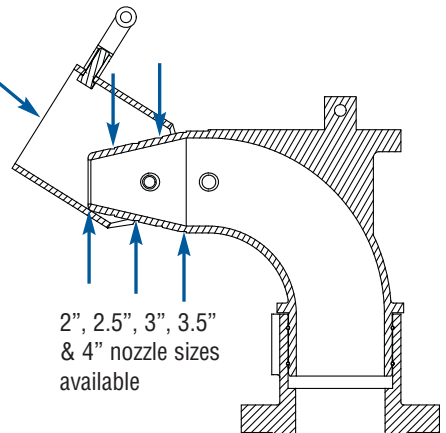

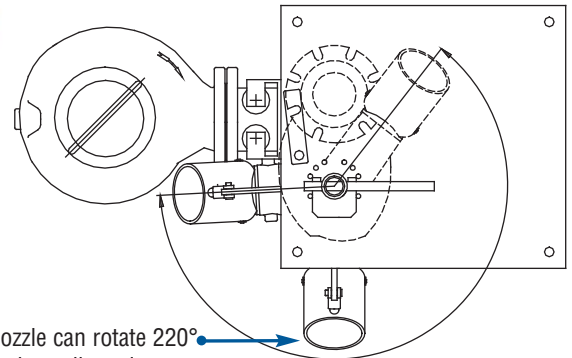

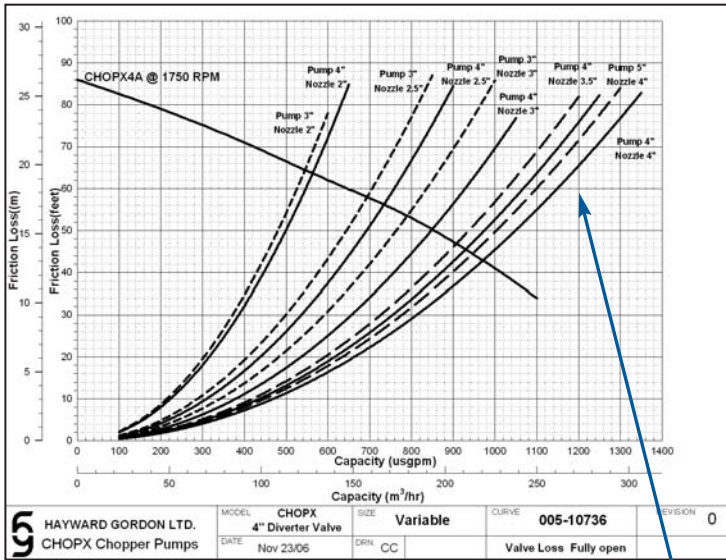

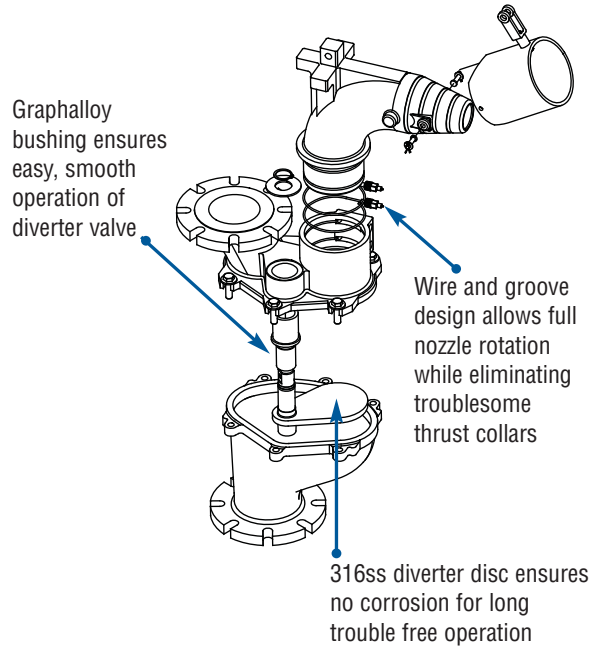

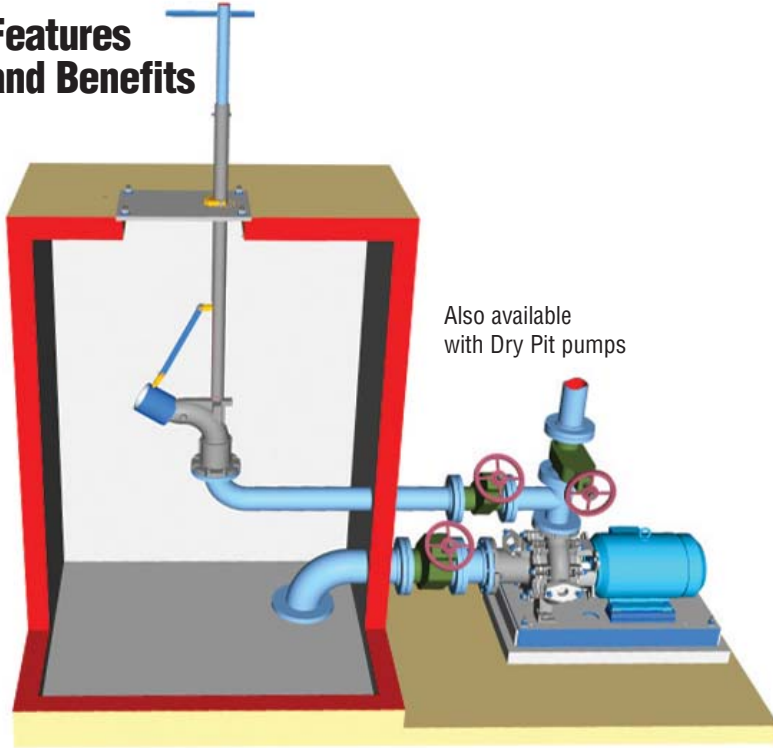

- Chop, re-circulate, mix and pump out tanks & basins with one system
- Available with submersible or vertical CHOPX pumps
- Suspend and incorporate solids prior to pump out
- Break-up and incorporate scum blankets

Applications Include:

- Scum collection pits
- Septage Receiving
- Food processing sumps
- Any sump, pit or basin where solids build-up is a problem

Features and Benefits

Trimmable nozzle allows optimum flow selection for each application, i.e. mixing different basin sizes & geometries
