FOR IMMEDIATE RELEASE

Mississauga, Ontario CANADA – September, 2004 - Hayward Gordon Ltd. is pleased to announce the acquisition of Chem Systems Inc., Burlington, Ontario.

Chem Systems is a well established supplier of chemical feed and blending systems, starch cookers, and bulk solids feeding systems.

Chem Systems Inc. (CSI), Burlington, Ontario, unveiled its **ChemVac® Solid Grade, High Performance, Dry Polymer System**. The new system features a unique “High Performance” Nozzle; the most efficient wetting system available operates at 100 PSI aggressively driving dilution water into each polymer particle. The pressurized flow in the HP-E Series wetting head develops a three dimensional pattern with such turbulence that it instantaneously separates and wets each “fine” polymer particle.
