

## Mixer Drives Engineered for the Municipal Market

### ST-30 Series Reducer

*Designed for small to medium sized flocculator and rapid mixer applications, this rugged agitator drive combines performance and adds value to your application.*

- Four reducer sizes available to 30,000 in-lbs.
- Large oversized output shaft and bearings to handle high cantilevered loads.
- Heavy duty all Helical AGMA quality 10 gearing.
- Piloted C-Flange motor mount design.
- Drywell construction.
- Oil lubricated reducer.
- Maximum double reduction ratio of 86.5:1

### MB-600 Series Reducer

*Designed for medium to large sized rapid and flocculator applications, this heavy duty mixer drive will provide years of dependable service.*

- Seven reducer sizes available with a torque rating of over 160,000 in-lbs.
- Output shaft designed with a drive sleeve allowing alternative material selections.
- Large oversized output shaft.
- Taper roller bearings throughout.
- Heavy duty, helical spiral-bevel gearing.
- Piloted D-Flange motor mount design.
- Drywell construction.
