Hayward Gordon to market Samson Liquid Ring Vacuum Pumps

Hayward Gordon has entered into a marketing agreement with Samson Pumps, a specialized manufacture of liquid ring vacuum pumps and liquid ring compressor pumps. For over 25 years, Samson liquid ring vacuum pumps have been an industry standard and can be found in process industries such as; chemical, petro-chemical, pharmaceutical and oil & gas.

The pumps range from the compact, close coupled "Monobloc" design up to multi-stage total recirculation systems. With capacities from 25 to 6000 m³/h, they are designed to provide a long life cycle, low maintenance costs and high reliability. The pumps are available in corrosion resistant materials and offer a standard solid welded stainless steel rotor and shaft.

Monobloc Pumps:

Capacity 30 – 150 m³/h
Pressure 33 – 1013 mbar

Standard Pumps:

Capacity 300 – 6000 m³/h
Pressure 33 – 4000 mbar

Compressors:

Capacity 300 – 650 m³/h
Pressure 33 – 7500 mbar

Features:

- Solid welded stainless steel rotor and shaft
- Mechanical Shaft Seal
- Corrosion resistant materials
- Proven technology
- Handling nearly all types of air, gases and vapour

Benefits:

- Long life cycle
- Cost effective performance
- Low maintenance costs
- Reliability
- ATEX certified (Zone 1)
- Low noise
- Short lead time
