

**FOR IMMEDIATE RELEASE**

## **Hayward Gordon is recognized by Watson Marlow Breidel Pumps**

MISSISSAUGA, ON – March, 2006 – Brent McConomy, National Sales Director is pleased to announce that Hayward Gordon has been appointed the '**Municipal Representative**' for all Watson Marlow Breidel products distributed in British Columbia, Alberta and Quebec.

**Watson Marlow Breidel** Peristaltic pumps have no valves, seals or glands, and the fluid contacts only the bore of the hose or tube. Simple to install, easy to use, and quick to maintain, they are the hot new technology, and the world's fastest-growing pump type. The simple glandless, "straight through" construction without valves, vanes has clear advantages in handling viscous sludges or other solids which cause blockages. They are also suitable for handling polyelectrolytes and chemicals like sodium hypochlorite.

Hayward Gordon Ltd., a Canadian owned and operated company – Since 1952, has been designing, engineering, manufacturing and distributing pumps, mixers, strainers and engineered systems for the process industries for over 50 years.

We have offices in British Columbia, Alberta and Quebec, as well as our head office in Mississauga, an extensive representative network in the United States, local representatives in Latin America and other countries World-wide.

If you need a process specialist and recognized leader in our industry, please contact:
